PROFESSIONAL SUMMARY

Aspiring Data Analyst and B.Tech Computer Science Engineering (AI) student with hands-on experience turning raw data into clear, actionable insights using SQL, Python (Pandas), and Power BI. Comfortable across the full analytics workflow — data cleaning, exploratory data analysis (EDA), dashboarding, and stakeholder reporting — with project work covering retail customer behavior, financial KPI tracking, and subscription churn and revenue analytics. Strong foundation in data-driven decision making and customer segmentation, looking to bring these skills to an entry-level Data Analyst role.

CORE COMPETENCIES

Data Analytics, Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), SQL, Data Visualization, Power BI, Dashboard Development, KPI Tracking & Reporting, Customer Segmentation, Churn Analysis, Financial & Revenue Analysis, Business Intelligence (BI), Stakeholder Reporting, Microsoft Excel, Python (Pandas), Statistical Analysis, Data-Driven Decision Making

Programming & Tools: Python, Java, C++, Data Structures & Algorithms (DSA), JavaScript (ES6), HTML, CSS, React.js, Machine Learning, Jupyter Notebook, VS Code, Git, GitHub

DATA ANALYTICS PROJECTS

Retail Customer Behavior & Shopping Trends Analysis

Technologies: Python (Pandas), SQL, Power BI, GitHub

- Defined a retail data analytics business problem statement and led end-to-end data analysis workflow: loaded, cleaned, and transformed raw customer and transaction data using Python (Pandas).
- Performed exploratory data analysis (EDA) and wrote SQL queries to identify shopping trends, customer purchase patterns, and answer key business questions for stakeholders.
- Designed and published an interactive Power BI dashboard to visualize customer behavior and shopping trends, improving data-driven decision-making; published full workflow and code on GitHub.

Credit Card Financial Dashboard

Technologies: Power BI, SQL

- Developed an interactive Power BI dashboard using SQL-based transaction and customer data to deliver real-time financial insights and KPI tracking.
- Streamlined data processing and analysis workflows to monitor key performance metrics, spending trends, and financial patterns across customer segments.
- Presented actionable, data-backed insights to stakeholders through dashboard reporting to support financial decision-making.

OTT Subscription Churn & Revenue Analytics

Technologies: Python, SQL, Power BI

- Engineered an end-to-end churn analytics pipeline for an OTT subscription platform, integrating multi-table subscriber data across acquisition type, contract structure, and plan tier (20+ KPIs).
- Uncovered a significant churn disparity between monthly and annual contract segments; quantified MRR (Monthly Recurring Revenue) leakage and CLTV (Customer Lifetime Value) erosion attributed to high-risk customer cohorts.
- Built a multi-dimensional churn risk scoring and customer segmentation model, and delivered a data-backed contract migration retention strategy to reduce subscriber loss and improve revenue retention.

EDUCATION

Teerthanker Mahaveer University — Bachelor of Technology, Computer Science Engineering

CGPA: 8.11

Priyanka Modern Sr. Sec. School, Dhampur (CBSE)

CERTIFICATIONS

- Python for Data Science — IBM
- Big Data Foundation — IBM SkillsBuild (IBM MOOC)
- Data Science Internship Certificate — CodeAlpha
- AI for Beginners — HP LIFE
- Full Stack Web Development — EliteTech
